Team name: !!
Project name: Nuggets and Coffee!!
Description: A website designed for both coffee and chicken nugget enthusiasts. Users will be able to look up where to buy either coffee or nuggets, search for different recipes, and discuss their favorite food with other fans.
Question - can we make money off this???

Job responsibilities:
James: PM
Jiaqi: Frontend (HTML, CSS and Javascript)
Jordan: Middleware
Sharon: Backend

Functionality:
- Search for places to buy
- Search for different recipes
- Discussion forum

Components

Front-end
    Javascript
    Bootstrap
    HTML
                index.html
                register.html
                main.html
                search.html
                buy.html
                making.html
                recipes.html
                favorites.html
                forum.html
Backend
    SQL database
                data.db
    Python files
                auth.py
                coffee.py
   nuggets.py
    Flask

APIs

Google Maps for finding nearby locations
Shutterfly or Flickr for getting random photos of coffee/chicken nuggets
